Рис. 1: Работа с пользователями

Сравниваем группы двух пользователей

```
[guest2@ivanprihodko root]$ pwd
/root
[guest2@ivanprihodko root]$ groups
guest2 guest
[guest2@ivanprihodko root]$ groups guest2
guest2 : guest2 guest
[guest2@ivanprihodko root]$ id -Gn
guest2 guest
[guest2@ivanprihodko root]$ id -G
1002 1001
[guest2@ivanprihodko root]$ cat home/guest2/etc/groups
cat: home/guest2/etc/groups: Permission denied
[guest2@ivanprihodko root]$ sudo cat home/guest2/etc/groups

We trust you have received the usual lecture from the local System
Administrator. It usually boils down to these three things:

    #1) Respect the privacy of others.
    #2) Think before you type.
    #3) With great power comes great responsibility.

[sudo] password for guest2:
guest2 is not in the sudoers file. This incident will be reported.
[guest2@ivanprihodko root]$ sudo cat home/guest2/etc/groups
[sudo] password for guest2:
